

AMENDMENT TO THE SPECIFICATION

Please amend paragraph [0019] from page 8, line 22, through page 9, line 3, as follows:

The plurality of angular adjustment sites are engaged by the bolt 134, shown in FIG. 3, which connects with the plurality of angular adjustment sites through the housing of the nail loading assembly 414 of the adjustable angle nail gun 400. FIG. 3 illustrates that the housing ~~134~~ 102 provides a first angular connection site 130 and a second angular connection site 132. The bolt 134 connects through either the first or second angular connection site 130 or 132 with the plurality of angular adjustment sites. In an exemplary embodiment, the bolt 134 connects through the second angular connection site 132 to the plurality of angular adjustment sites disposed on the fastening assembly 402. The adjustable angle nail loading assembly 414 couples with the adjustable angle nose casting assembly 416 which is coupled with a casing 418 housing a nail driving assembly coupled with a trigger 420. The casing 418 is coupled with the handle 404.
